objective evaluation process

why cut tests

it's **not** *what you think*

really why cut tests

percentage well-fermented is *not*
an objective measure of quality

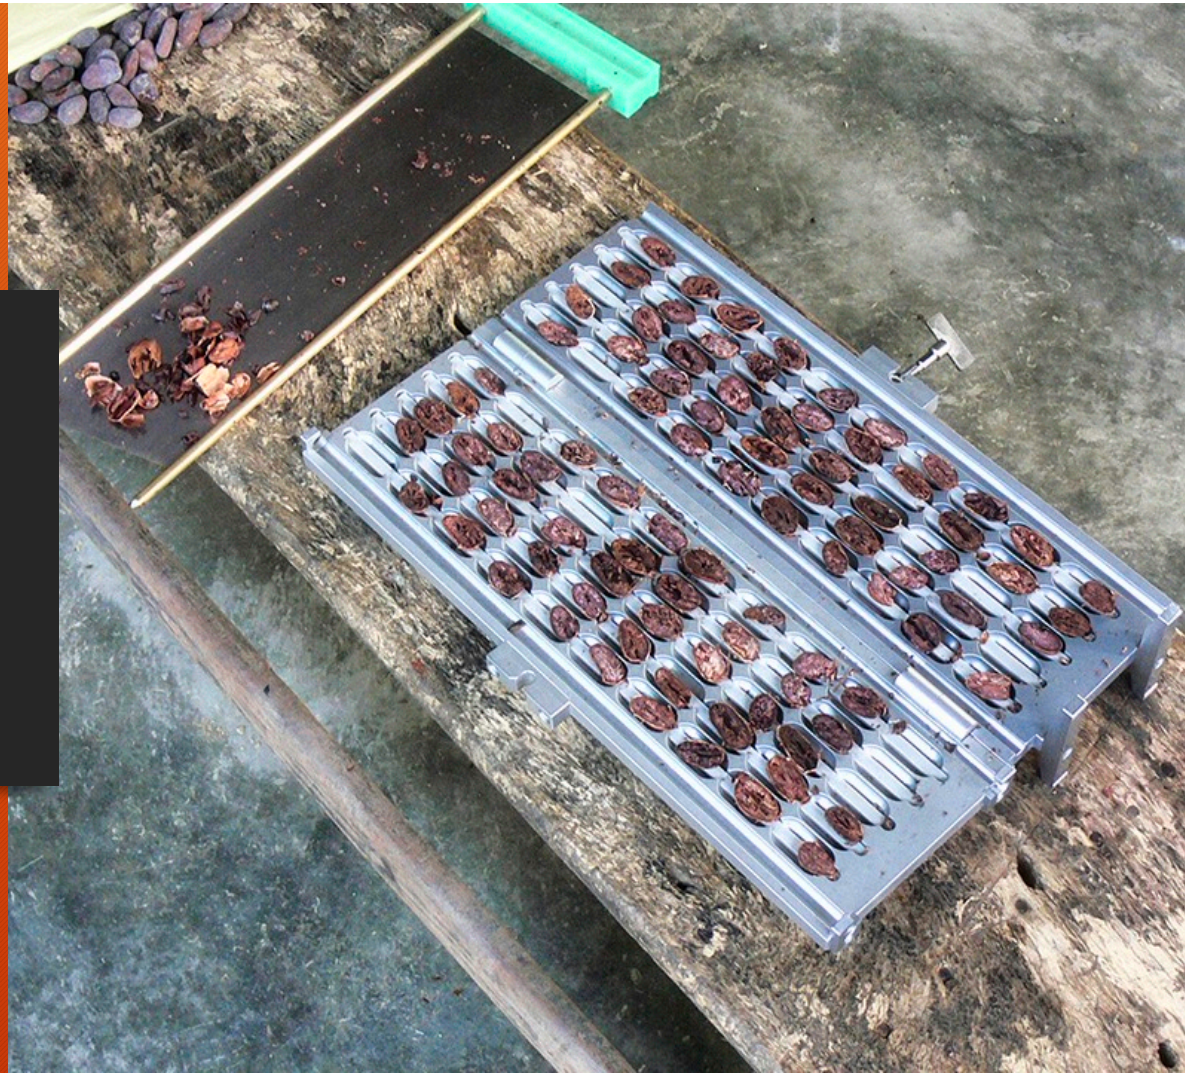
what *everyone* gets wrong

where you perform your cut tests (and *maybe when*) can affect the results

who where when cut tests

open sun

open shade



open shade

open shade

indoors

Hoja de Prueba de Corte

The one evaluation step almost no one performs
that *everyone* should
and it's not a *visual* evaluation

upping your game
