

Prefix Equipment Manufacturing

High Throughput, Compact Cocoa Bean Cracker
Model: eXeXO

- *High throughput with virtually no loss--feed rates from 1 to 3000 lbs/hour produce the same cracking quality
- *Compact footprint--26" wide by 36" long by 60" tall
- *Cracking mechanism works on beans of any size
- *Cracking mechanism is virtually un-jammable, so you never have to worry about poking and prodding beans through
- *Digitally adjustable speed control for adjusting cracking power to optimize cracking of beans with varied shell thickness and moisture content
- *Works on raw beans as well as roasted
- *Cracking creates considerably less dust than roller mill type crackers which equates to higher yield in winnowing, more final product, which directly equates to more revenue
- *Cracking produces larger, more uniform, and fewer pieces of shell, so winnowing can be completed more quickly.
- *Runs on 15A, 120V 60Hz power source
- Zinc treated, powder coated frame to resist rust in wash down environments, even in the event of chipping
- *Designed and used by a small batch chocolate maker in a production setting
- *Engineered to last a lifetime
- *Aesthetically can be a showpiece

Offered at an introductory price of \$8500 plus tax and shipping.
