

ROTTAR 65 KG “THE BEAST”

Made in America with American Steel & Granite

Description

Purpose-built. *Rottar* didn't start out making chocolate machinery, they started out making chocolate. Their experience with machinery of dubious quality and limited control led them to years of modifying and rebuilding until it became obvious that they could simply build a better machine. *Rottar* knew they could make better chocolate with better equipment, and that's exactly what they did.

“We help chocolate makers make better chocolate.” *Rottar*
